THERESA DUFFEY

"The Invisalign aligners really worked. I am still amazed when I look in the mirror and see the results."

CHRISTY BLANKS

"I am more confident and I am constantly complimented on my smile now that I have Lumineers."

*Beautiful, healthy Smiles begin
in our Modern and Caring practice.*

Love the care you receive from a dedicated dental team. Your dental care is of the utmost importance, and you can expect to enjoy the most comprehensive dental care in a relaxed and rejuvenating environment. Your dental experience will be efficient and comfortable, due to the latest technology and education in dentistry utilized in our office.

Cosmetic

You can have a beautiful, brilliant smile that leaves you with the confidence you need to face the world. Crooked teeth, spaces between your teeth, stained or discolored teeth, chipped teeth, broken or missing teeth and “gummy” smiles can be corrected through cosmetic dentistry. Your age, goals and financial comfort level will be taken into account, and a plan customized for you.

Restorative

Years of wear and tear, injury or poor care can damage the functionality and beauty of your teeth. This can cause your smile to look dull and lifeless. Your smile can be returned to its original health and vibrancy through restorative dentistry.

Preventative Dentistry

New advances in dental and oral health screening will help you to maintain your overall health and well-being. You will be able to sleep easy knowing your health is in the hands of a competent team that has utilized the latest technology in preventative dentistry.

Technology

Your satisfaction with your visit and continued excellent oral health is of the utmost importance. The latest technological advances in dental equipment and techniques ensure your dental experience is comfortable and safe.

You can take advantage of a variety of new services offered to make your visit more rewarding and to give you the smile you have always wanted. They include Lumineers, Invisalign™, VELscope, tooth whitening and sedation dentistry.

Lumineers- Smile Makeovers

Lumineers by Cerinate are the newest advancement in veneer technology. They are contact-lens thin veneers that offer a painless way for you to have a whiter, straighter smile with minimal tooth reduction. They are also a great way to close gaps and correct chips. You can receive a smile evaluation today and be on your way to the whiter, brighter smile you have always wanted.

Invisalign™- Straighten teeth with out braces

Uncomfortable metal braces are a thing of the past. Invisalign™ is a new FDA approved teeth straightening system that uses clear aligners to straighten your teeth in increments. Come in today and find out if Invisalign™ is right for you.

VelScope- Early Cancer Detection

Your oral health is important, and the FDA approved Velscope oral cancer screening system, a powerful new tool in the fight against cancer, provides you with a quick, safe and comfortable way for the earliest detection of oral cancer.

Tooth Whitening – Brighter Smiles

You can have the brilliant, white smile you have always want. New advances in tooth whitening technology such as an in-office tooth whitening system and at-home whitening kits can restore your smile and give you the confidence a beautiful smile can instill. Come in today to discover the tooth whitening system that is best for you.

DIAGNOdent®- Early Cavity Detection

DIAGNOdent®, the newest advancement in cavity detection technology, is a portable technology that allows detection of cavities on the chewing surfaces of the back teeth and cavities in their earliest stages. These are the cavities that are the most difficult to detect, and early detection means the continued health of your teeth.

Sedation Dentistry- Comfortable Treatment

Sedation dentistry can ease the extreme anxiety you may feel when visiting the dentist. Sedation dentistry helps you to remain comfortable and relaxed during your procedure.
